C.

Icons/Buttons	Description
Align Left	The text is aligned to the left side of the cell.
Fill Color	Colour the background of the selected cells.
Orientation	It rotates the text at different angles inside a cell.
Wrap text	This command makes all contents visible within a cell.
Currency Number Format	This format helps to display numbers as currency.

D. Answer the following questions.

1. Explain the importance of Wrap Text in Excel 2016.
 1. **Wrap Text** makes all content visible within a cell by displaying it in multiple lines.

2. Define the terms orientation and indentation.

Orientation means direction or positioning. Orientation of text is the rotation of text in different angles inside the cell.

Indent is the distance between the cell boundary and text. You may increase or decrease the indent for better spacing.

3. Do you think Merge & Center is a useful feature? Why?

Merge & Center is a useful feature that merges the selected cells into one larger cell. The text is placed in the center of the cell. Hence, used to create labels that span multiple columns.

4. Steve is preparing a list of expenses and need to enter the amount in an Excel worksheet. He does not know how to insert the currency symbol. Which feature of Excel do you suggest him to use?

To add currency symbol, follow the steps:

Step 1: On the **Home** tab, in the **Number** group, click the drop-down arrow next to the **Number Format** command.

Step 2: Choose the **Currency** options.

5. How does applying border to a range of cells help in understanding the worksheet content?

By applying borders to a range of cells, one can easily differentiate between different types of data. It helps a person to read similar types of information.
